

# STAIN-PROOF™

## CASE STUDY

**Client:** Ivy Cottage, Frodsham  
**Surface:** Victorian Geometric Encaustic Tiles  
**Project date:** January 2012

**Applicator:**  
Steve Sinnott  
(info@heritagetiling.com)

## The Project

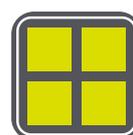

Steve Sinnott from Heritage Tiling and Restoration Co. was tasked to restore damaged small geometric floor due to a porch that was added 10 years after the house was built (1880).

## The Requirements

- Provides long lasting protection and warranty
- Protection against damage caused by water and oil
- Sealer has to allow the surface to breathe
- Minimal maintenance
- Does not change the look of the tiles

[www.drytreat.com](http://www.drytreat.com)

**DRYTREAT**  
Excellence in sealing products™

To fulfill the requirements, Steve chose Dry-Treat STAIN-PROOF™, the world's leading impregnating, invisible, breathable sealer. This is what Steve said in a magazine interview:

I have found Dry-Treat products to be the best I have used over the last 40 years bar none; Stain-proof is the best sealer in my opinion for sealing Victorian tiles as it allows the tile to breathe, the sealer doesn't need to be stripped and re-applied like dwell-on sealers and oil and water borne spills are prevented from staining the tile surface.

- Steve Sinnott, NCMagazine 111, UK

Victorian Geometric tiles are very absorbent, so a light preseal with Stain-Proof prior to the 2 main coats is necessary. Because of the heritage values of the tiles, it is important to use a sealer that does not change the outward appearance, and STAIN-PROOF does just that.

A 15-YEAR PERFORMANCE WARRANTY is offered when STAIN-PROOF Original™ product applied by an Accredited Applicator following our written instructions, and surface is maintained regularly using our recommended maintenance system.
