

CASE STUDY

Brevard County, Florida, USA

PROJECT OVERVIEW

Soapstone, also known as steatite, is a natural stone prized for its smooth texture, rich color, and distinctive character. Traditionally, soapstone countertops are maintained with mineral oil to accelerate the development of a dark, even patina and enhance the stone's natural beauty. However, repeated oil applications can be time-consuming and require ongoing maintenance to preserve the desired appearance.

Because soapstone is extremely dense, conventional penetrating sealers are generally ineffective. The homeowner was looking for an alternative solution that would enhance the stone's color, eliminate the need for routine oiling, and provide a longer-lasting, low-maintenance finish.

SPECIAL REQUIREMENTS

- Eliminate the need for regular oiling of the countertops
- Enhance and enrich the natural color of the soapstone
- Provide a long-lasting, low-maintenance finish

THE STAIN-PROOF® SOLUTION

To achieve the desired look and simplify ongoing maintenance, the client chose STAIN-PROOF® Color Enhancing Sealer. Specifically formulated to enhance the natural beauty of dense stone surfaces, this premium treatment combines the benefits of a color enhancer with the performance of an impregnating sealer.

The result was a rich, deepened appearance that highlighted the natural character of the soapstone while eliminating the need for continual oil applications. The homeowner achieved the dark, enhanced finish they wanted with a solution that is easy to maintain and designed to deliver long-lasting results.

RESULTS

Following the application of STAIN-PROOF® Color Enhancing Sealer, the soapstone countertops achieved a deeper, richer appearance that enhanced the stone's natural beauty while reducing ongoing maintenance requirements. The homeowner no longer needed to regularly apply mineral oil to maintain the desired finish, resulting in a more convenient and consistent long-term solution.
