40SK CONSOLIDATOR & WATER REPELLENT

PREVIOUSLY KNOWN AS DRY-TREAT 40SK™

An impregnating, invisible and breathable sealer that protects porous tile, natural stone, brick, terracotta, paving and grout from damage caused by water and salts. 40SK Consolidator & Water Repellent helps reinforce friable stone surfaces by fortifying the internal structure of the substrate.

Salt Spalling

BENEFITS

- Penetrating, permanent water repellency plus consolidation of softer materials, for premium protection against problems caused by water and water-borne salts including: efflorescence, salt spalling, freeze-thaw spalling and picture framing.
- Popular for sealing sandstone, limestone, travertine, concrete dry-stamped pavers and composite stone pavers around salt water swimming pools.
- Retains natural surface color and finish.
- Keeps surfaces looking new for longer, makes cleaning easier, and dries quickly even after heavy rain.
- Breathable formula: water vapor escapes freely, avoiding moisture build-up inside the material.
- Designed for indoor and outdoor surfaces.

*A fifteen year performance warranty is offered when product is applied by an accredited applicator and surface is maintained regularly, as outlined in our warranty document. Visit our website at www.stain-proof.com to find your nearest accredited applicator.

STAIN-PROOF'S IMPREGNATING SEALERS AND CLEANERS

THE TECHNOLOGY THAT SETS US APART

Stain-Proof® sealers are formulated using a unique sealing technology – our sealer molecules are approximately 400+times smaller than other impregnators and penetrate much further into the pores to form a deeper water and oil repellent barrier, providing optimum protection to surfaces such as natural stone, bricks, pavers, tiles, engineering concrete and grout. **Stain-Proof also offers daily and heavy-duty cleaners specifically formulated to tackle a variety of needs. To choose the perfect care and maintenance solution for your project, visit stain-proof.com.**
