STAIN-PROOF™

PREMIUM IMPREGNATING SEALER

World leading protection for
natural stone, tile, paving and grout

- Premium stain protection**
- Protects against efflorescence, freeze-thaw and salt damage
  (Highly porous materials require Dry-Treat 40SK for freeze-thaw/salt protection)
- Breathable: water vapor permeates freely, avoiding moisture build-up inside the material
- Treated surfaces are easier to clean
- Retains wet slip resistance, existing color and finish
- Suitable for indoor, outdoor, residential and commercial use
- Provides long lasting protection and comes with
  15 year warranty*

STAIN-PROOF™ will protect:

- Basalt
- Brick
- Cement pavers
- Clay pavers
- Concrete
- Encaustic tiles
- Granite
- Grout
- Limestone
- Marble
- Quarry tiles
- Saltillo tiles
- Sandstone
- Slate
- Terracotta tiles
- Terrazzo
- Travertine

*Warranty valid after being applied by an Accredited Applicator – see product label for details. Impregnating sealers do not protect against acid etching, wear, and water pressure. **In accordance with ISO 10545-14 Determination of resistance to stains Class 5 (highest class)
BEFORE SEALING:
- Surfaces must be thoroughly clean and dry before applying a sealer. Once sealed, the surface becomes water repellent, making it tough to remove existing stains.

ALL YOU WILL NEED:
- STAIN-PROOF™
- Low pressure hand spray/lamb’s wool applicator/brush
- Sufficient white absorbent cloths/towels
- Safety gear (gloves, protective eyewear, mask or chemical respirator if in a confined space)

SEALING IN 5 EASY STEPS: (Refer to the back of the bottle for more information)

1. TEST: Test product on a small area of the surface, wait 24 hours, and ensure you are satisfied with the results.
2. CLEAN: Make sure the area to be treated is clean, dry and free of residues or topical coatings.
3. FIRST COAT: Generously saturate the surface with STAIN-PROOF™ using a lamb’s wool applicator / brush / pump spray. Leave to penetrate for at least 10 minutes.
4. SECOND COAT: Before the first coat dries, apply a second generous coat of STAIN-PROOF™. Leave to penetrate again for at least 10 minutes.
5. REMOVE EXCESS: Before the second coat dries, thoroughly polish off all residue with clean, dry white cloths / towels. If the residue has been left too long, moisten a cloth with STAIN-PROOF™ to ease removal and polish off with dry cloths / towels.

Note: Surface can be walked on 2-3 hours after application. Do not get the surface wet for at least 8-10 hrs.

MAINTAINING YOUR SEALED SURFACE:
Dry-Treat has developed specialist cleaners under the HANAFINN™ brand to clean and maintain your natural stone surface.
