

Uzbekistan National Library

Surface Type: Marble | **Product Used:** STAIN-PROOF Original™ | **Completed:** May 2012

Applicator: Megapoxy Hellas

Phone: +30 210 6625117

THE PROJECT:

Dry-Treat's flagship sealer, STAIN-PROOF Original™ was used recently in Tashkent, Uzbekistan, sealing over 129,166 sq. ft. (12,000sq.m) of the National Library. Megapoxy Hellas, Dry-Treat's distributor for Greece won the important project and oversaw the sealing process.

This was a huge task, which required a great deal of professional equipment, including two high-level cherry pickers and vast scaffolding systems. The job was completed in 20 days, thanks to the commitment and hard work of the professional crew.

SPECIAL REQUIREMENTS:

The special requirements for sealing the materials during production were:

- Sealer must not alter the original look.
- Sealer must be water and oil repellent.
- Sealed surfaces must be able to be easily maintained with simple cleaning methods.
- Sealer must be permanent.

THE DRY-TREAT SOLUTION:

STAIN-PROOF Original™ makes the treated indoor and outdoor surfaces permanently oil and water repellent, so that spills remain up on the surface, where they can be easily mopped off. STAIN PROOF Original™ will cure enough in 8 – 10 hours for the surfaces to be used, so sealing can be performed after-hours without interrupting traffic. Surfaces treated with STAIN PROOF Original™ are much easier to clean with use of regular cleaning methods. STAIN PROOF Original™ bonds permanently with the treated material and does not alter the original look of the surface. A 15 year performance warranty is available when STAIN-PROOF Original™ is applied a Dry-Treat™ Accredited Applicator.
