

BALLINA TOWN CENTRE
NSW, Australia

Surface type: Urban Stone

Sealer: STAIN-PROOF™

The Project

Ballina is a coastal township in the heart of the rural countryside of sub-tropical Northern New South Wales. It boasts some of the most beautiful surfing beaches and headlands on the east coast of Australia.

When the Council undertook sealing of 12,000sq^m of Urban Stone in the Ballina Town Centre almost 10 years ago, a special sealer was required which would last the test of time.

Special Requirements

The Council had a number of special requirements for sealing the outdoor space:

1. A long performance warranty period.
2. The sealer had to be able to protect the UrbanStone from staining by food and beverage spills, bird droppings and leaf litter.
3. Cleaning had to be easy and able to be achieved without the use of special cleaning products which would create an additional long-term cost burden.
4. The sealer had to be proven on high traffic commercial spaces.

Dry-Treat Solution

STAIN-PROOF™ was chosen for:

1. Its 15 year warranty when applied by an Accredited Dry-Treat Applicator
2. Its proven stain resistance
3. Ease of maintenance – STAIN-PROOF™ allows the surface to be cleaned using standard commercial techniques, such as high pressure hosing and scrubbing.

After nearly a decade and thousands of visitors to Ballina Town Centre with its al fresco dining, shopping and entertainment, as well as outdoor spaces and play areas for children, the UrbanStone continues to remain in excellent condition.
