DAILY FLOOR CLEANER
PREVIOUSLY KNOWN AS REJUVEATA™ ACTIVE

A powerful, natural active enzyme cleaner concentrate for both heavy duty and light duty (regular) cleaning of all natural stones, tile, grout, brick and other hard surfaces. Daily Floor Cleaner contains 3 different enzymes for removing general grime and stains caused by grease / oils, mold, food and beverages.

TYPICAL APPLICATIONS

Daily Floor Cleaner is recommended for cleaning indoor surfaces including kitchen floors, bathrooms, eating and entertaining areas. Daily Floor Cleaner can be used for light regular mopping, heavy duty cleaning and removal of stains caused by oil / grease, mold, leaf marks, food and beverages.

Safe for domestic and commercial cleaning of hard surfaces, including:
- all natural stone (including acid sensitive, calcite based stones such as marble and limestone)
- porcelain, ceramic and clay tile
- grout
- vinyl and unfinished wood (with no stain, oil or other coatings).

BENEFITS

- Daily Floor Cleaner contains 3 different, powerful natural active enzymes (similar to those in your gut) that quickly break down oils, grime, food residue, and stains caused by mold. It is environmentally responsible and safer to use than many traditional chemical cleaners.
- Super Concentrate - only 3 to 4 capfuls in a bucket of water required for regular mopping
- Effective for heavy duty cleaning and stain removal (using a higher concentration)
- For domestic and commercial cleaning, including in scrubbing machines.
- Hyper-biodegradable - decomposes quickly into oxygen and natural minerals
- Safe to transport and gentler on skin than traditional alkaline / caustic / solvent cleaners

HOW TO USE

light duty cleaning | mopping:
1. TEST PRODUCT ON A SMALL AREA BEFORE FULL APPLICATION.
2. Apply when surface temperature is between 5-35° C (40 - 95°F). Remove dust and dirt from surface by sweeping or vacuuming.
3. Pour 4-6 capfuls of STAIN-PROOF™ Daily Floor Cleaner into a bucket of clean warm water (2 gallons / 8 Liters). Stir briefly. More soiled surfaces may need a higher concentration.
4. Mop the surface, rinsing the mop frequently. If the mixture in the bucket becomes too dirty, rinse the mop thoroughly in clean water and mix fresh bucket of cleaner and water to continue mopping.
5. In light concentrations, the cleaner should not leave residue. If used in heavier concentrations, mop off residue with clean water.

heavy duty cleaning | stain removal:
1. TEST PRODUCT ON A SMALL AREA BEFORE FULL APPLICATION.
2. Apply when surface temperature is between 40 - 95°F (5-35°C). Remove dust and dirt from surface by sweeping or vacuuming.
3. Pour 1/3 of a bottle of STAIN-PROOF™ Daily Floor Cleaner into a bucket of clean warm water (2 gallons / 8 Liters). Stir briefly.
4. Generously apply to the surface and leave for a few minutes to allow enzymes to break down the dirt / stains.
5. Before cleaner dries on the surface, scrub with suitable brush or deck scrubber.
6. Rinse thoroughly with clean water and mop
7. For stains or spots where normal heavy duty cleaning has not produced a perfect result, apply STAIN-PROOF™ Daily Floor Cleaner undiluted, allow to sit for a few minutes, scrub with a suitable brush before it dries and rinse thoroughly.

CAUTIONS

PRECAUTIONS: Do not handle until all safety precautions have been read and understood. Observe good hygiene practices. Wash thoroughly after using. Use in a well ventilated area. KEEP OUT OF REACH OF CHILDREN.

FIRST AID

If exposed or concerned get medical advice. IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs get medical advice. IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If breathing has stopped give artificial respiration. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF SWALLOWED: Immediately call a poison center or doctor.

STORAGE

Store in a well ventilated place. Keep container tightly closed. Keep cool and locked up. IN CASE OF Fire: Use alcohol resistant foam or normal protein foam for extinction.

DISPOSAL

Dispose of contents in accordance with applicable local/national/regional/international regulations.
